## 2014 SELECTED ASTM STANDARDS ON CONCRETE PIPE

In the serial designations prefixed to the following titles, the number following the dash indicates the year of original issue, or in the case of revision, the year of last revision. Thus, standards adopted or revised during the year 2014 have as their final number 14. A letter following this number indicates more than one revision during that year, that is, 14a indicates the second revision in 2014, 14b the third revision, etc. Standards that have been reapproved without change are indicated by the year of last reapproval in parentheses as part of the designation number, for example, (2014). A superscript epsilon (<sup>ε</sup>) indicates an editorial change since the last revision or reapproval—<sup>ε1</sup> for the first change, <sup>ε2</sup> for the second change, etc.
